

SCULPTURES

(How many have you already encountered? Do you know others to add? Use highlighter if contributing any missing information.)

Pick 9 Public sculptures, on campus/in greater Lafayette area. Note locations in your left margins.

Physically visit a variety* (one bust, one fountain, one relief, etc.) of 9 free-standing or low relief sculptural works to I-D-A-I-J. For #10: Draw line A, measured into categories in this order (natural, realistic, stylized, semi-abstract, abstract, non-objective). Place your 9 numbers where they would fall on this line, from most representational to least.

On a new line B, labeled favorite to least favorite, place the 9 numbers where they should fall. Would you have guessed this about your taste in 3-dimensional forms? (Attach a full page digital image of one of the works we don't have on file, if you'd like) In the right margin, write a best word for the purpose of each.

Beware, some sites not current. Don't copy! <https://engineering.purdue.edu/UVAC/CampusArt/Sculptures> <https://engineering.purdue.edu/UVAC/News/archive>

Note: not all 3-D objects are primarily called sculptures. When another word best describes it (though it may have sculptural elements incorporated), avoid it: bell tower, 3-D stone signage, grave markers, water fountains, reflecting ponds, engineering keys, etc. There are plenty of other sculptures.

Title	Artist	Location
ON CAMPUS		
* Transformation	Faustino Aizkorbe	Ag Mall, Marstellar St. (Class of 1952, in 2002)
* Continuum	Larry Anderson	in front of Lynn Hall/Vet school
- Yue-Kong Pao bronze bust?	In Pao Hall by gallery lobby
-(giant compass tool)?	In Pao Hall by gallery lobby
-(figures)?	Relief, outside, Purdue Memorial Union
