The Studio: Presentations

In the Line of Sight
TUESDAY, 27 JULY | 10:45 AM - 12:15 PM | THE STUDIO/ROOM 151

Daniel Sauter and Fabian Winkler introduce their current collaborative light installation In the Line of Sight, displayed in the SIGGRAPH 2010 Art Gallery (TouchPoint: Haptic Exchange Between Digits). Using historical examples, investigations into the violent qualities of light, and critical reflections on cutting-edge technological developments, Sauter and Winkler place their work in a rich context of surveillance systems, visual ambiguity, and light spectacles. The presentation concludes with a discussion of the artists' current work and research.
