

One tribe, one time, one planet, one race
It's all one blood, don't care about your face
The color of your eye
Or the tone of your skin
Don't care where you are, don't care where you been
'Cause where we gonna go
Is where we wanna be
The place where the little language is unity
And the continent is called Pangaea
And the main ideas are connected like a sphere

"One Tribe" -Black Eyed Peas
