

LING 201 INTRODUCTION TO LINGUISTICS

**Summer
Course
Offering
2025**

**Explore the scientific study of language!
All majors are welcome!**

We'll cover the basics of:

- Phonology – the sounds of language
- Morphology – the structure of words
- Syntax – how sentences are formed
- Semantics – how meaning works
- Language & Society – how language reflects and shapes culture
- Psycholinguistics – how language is processed in the mind
- Child Language Acquisition – how children acquire language
- Computational Linguistics – how language and technology intersect

Why take Linguistics?

- Sharpen your analytical & problem-solving skills
- Boost your writing, logic, and reasoning abilities
- Explore how Linguistics connects to your field of study and offers a fresh perspective
