

How to connect to PAL 3.0 (macOS)

Click on the Wi-Fi icon in the menu bar and select PAL 3.0

Enter your Purdue career account credentials.

- a) Set Mode to Automatic
- b) Enter Username and Password
- c) Click Join

If you are prompted to verify a certificate, click OK or Continue. Enter your login username and password to save the certificate settings.

Troubleshooting – if you are unable to connect

1. Click on the Apple icon in the upper left, open System Preferences, and select Network.
2. Select the Wi-Fi icon from the left side menu.
3. Select any available network name that is not PAL, such as “attwifi”.
4. Once connected, click on the “Advanced...” button in the lower right.
5. Select the Wi-Fi tab and choose any saved PAL networks from the list of Preferred Networks and remove them by clicking on the minus sign.
6. Select the 802.1x tab and choose the saved PAL profile. Click on the minus sign to remove it.
7. Close System Preferences and launch Keychain Access. This is found in the Utilities folder under Applications.
8. Delete any saved PAL credentials and retry your connection to PAL through the above steps.
