COURSE DESCRIPTION & OBJECTIVES

Too often the world's peoples, civilizations, and nations are studied in isolation from one another. This course takes the opposite view: that particular societies cannot be understood unless they are seen as embedded in and interactive within a global whole. We will use the framework of "Uneven and Combined Development" (UCD) to understand this dynamic interaction between different parts of the world. UCD forces us to be attentive to two crucial things, how societies influence each other and how these influences contribute to or hamper their development.

This course will challenge passive historical statements such as "X is a poor country" but rather ask "How did this country/region get poor?" "who benefitted from its poverty?"

As a student in this course, you will develop a new understanding of global history. The aim of this course is to teach you the historical significance of global interconnections between the world's civilizations and peoples from 1500 C.E. to the present. It also aims to help you develop the critical thinking skills that are necessary for understanding different historical contexts and points of view.

STUDENT LEARNING OUTCOMES

Upon completion of this course, students will be able to:

- Analyze developments in global history from 1500 C.E. to the present.
- Understand interaction between regions as fundamental to the growth or suppression of regional histories.
- Develop a critical outlook of dominant narratives of global history.
